

Therapeutic Targets and Perspectives in the Pharmacological Treatment of Neurological Disorders

Neurological disorders are a major cause of disability and death worldwide. The development of effective pharmacological treatments for these disorders is a major challenge, due to the complexity of the nervous system and the blood-brain barrier.

This book provides a comprehensive overview of the latest advances in pharmacological treatments for neurological disorders, with a focus on therapeutic targets and future perspectives. The book is divided into four sections:

- **Section 1:** General principles of pharmacological treatment of neurological disorders
- **Section 2:** Therapeutic targets for specific neurological disorders
- **Section 3:** Future perspectives in the pharmacological treatment of neurological disorders
- **Section 4:** Case studies

This section provides an overview of the general principles of pharmacological treatment of neurological disorders. It covers topics such as:

Therapeutic Targets and Perspectives in the Pharmacological Treatment of Epilepsy (UNI-MED Science) by Jordan Rubin

★★★★★ 5 out of 5

Language : English

File size : 4442 KB

Print length : 113 pages

Screen Reader : Supported

- The blood-brain barrier and its implications for drug delivery
- The different types of pharmacological targets for neurological disorders
- The challenges of developing new pharmacological treatments for neurological disorders

This section provides a detailed overview of the therapeutic targets for specific neurological disorders. It covers topics such as:

- Alzheimer's disease
- Parkinson's disease
- Multiple sclerosis
- Epilepsy
- Stroke
- Traumatic brain injury

This section provides an overview of the future perspectives in the pharmacological treatment of neurological disorders. It covers topics such as:

- New drug delivery systems
- Gene therapy
- Stem cell therapy
- Personalized medicine

This section provides a series of case studies that illustrate the use of pharmacological treatments for neurological disorders. The case studies cover a variety of disorders, including Alzheimer's disease, Parkinson's disease, multiple sclerosis, epilepsy, stroke, and traumatic brain injury.

This book provides a comprehensive overview of the latest advances in pharmacological treatments for neurological disorders, with a focus on therapeutic targets and future perspectives. The book is a valuable resource for researchers, clinicians, and students in the field of neurology.
